

## *Convenient Monitoring of Multiple Inputs Simultaneously*

- View up to 20 outputs simultaneously
- Selectable full screen view
- High resolution ethernet streaming
- Displays closed captioning and subtitling
- View on computer monitor, plasma screen, or projection screen
- Powerful addition to Digital Broadcast automated master control systems

Digital Broadcast's IP MultiViewer offers the space-saving convenience of monitoring up to ten outputs simultaneously at a single screen.

The IP MultiViewer features high resolution ethernet streaming with HDMI and DVI outputs. When desired, a single source can be viewed full screen with a simple mouse click.

The IP MultiViewer supports closed captioning and can display subtitling when needed. It displays text labels, both static and dynamic, as well as clocks and timers

IP MultiViewer can be viewed on computer monitors, plasma screens or projection displays. The robust IP MultiViewer hardware includes the reassurance of redundant power supplies.

The MultiViewer offers a powerful adjunct to Digital Broadcast's MediaFire IP Automated Master Control system.
